

PREGNANCY & BREASTFEEDING GUIDE

This Second publication of GPP Board, Pregnancy & Breastfeeding Guide, offers relevant Practice advice on the Core Care of mothers and their babies before, during and after pregnancy. It is entitled to establish a good communication between the pharmacist, as a healthcare provider, and the mother and her family, supported by the provision of evidence-based information offered in a form that is tailored to the individual mother during pregnancy and breastfeeding periods.

The community pharmacist will find this guide an easy and good reference for professional consultation on pharmaceutical issues related to pregnancy, breastfeeding, care of mother and babies.
